SUBJECT INDEX

A

Acetaminophen poisoning, 280
Ambulance service, loving care in, 306
Amsterdam, strategies for nursing conscious mechanically ventilated patients in, 140
Analgesics administered to surgical cardiac patients after extubation, amount, 192
Arterial lines, non-heparinised 0.9% sodium chloride for transduced, 148
Audit
  multidisciplinary, of manual hyperinflation technique, 265
  quality of nursing care, 354
Autonomy, patient, reflection used to explore influences of different types of knowledge and theory on concept of, 314

B

Baltimore (USA), shock trauma facility, 151
Bedsores, *see* Pressure sores
Brain death, helping family cope with, 318

C

Carbon dioxide, intragastric, consistency of performing specimen collections for measuring, 123
Cardiology, *see* Heart
Children, *see also* Neonatal medicine
  in adult unit, 100, 161
  ethical issues, 36
  pain assessment, 20
  tonsillitis case study, 157
Communication, patient–nurse, 111
Cooling techniques in heatstroke, rapid, 198

D

Death, brain, helping family cope with, 318
Decubitus ulcers, *see* Pressure sores
Discharge
  from hospital, interviews with post-intensive care patient 6 months after, implications for future practice, 329
  from ICU, reducing relocation stress after, 333
Doctors and nurses learning together, 243
Drowning, near-, 40

E

Ecstasy overdose, 6
Education (in intensive care), 93
  in-service, theory–practice gap bridged via, 233
  together with doctors, 243
Estonia, neonatal medicine, 49
Ethical issues, 32
  paediatrics, 36
Europe, Eastern, neonatal medicine, 49
European research in intensive care nursing, very little, 244
Eye care, 217

F

Families/relatives (of patients)
  brain death and, 318
  involvement in care, 256
  self-perceived needs of, 77
Fentanyl, 360
Free radicals, oxygen, 336

G

Gastric pHi and CO^2, consistency of performing specimen collections for measuring, 123

H

Heart
  congestive failure (acute)
    nursing management, 272, 322
    pathophysiological alterations, 210
  myocardial infarction, *see* Myocardial infarction
  surgery
    patient characteristics and amount of analgesics administered after extubation, 192
    transplantation, advanced technology within process of, 170, 242
Heat stroke, rapid cooling techniques in, 198
High-dependency unit, comparative study of patients admitted after major and non-major surgery, 66
Home-based rehabilitation programme in acute myocardial infarction, 10
Hyperinflation of lung, manual, in neurosurgical intensive care, multidisciplinary audit, 265

I

Infant, newborn, medical care in E. Europe, 49
Infarction, acute myocardial, home-based rehabilitation programme, 10
Informed refusal, reflection used to explore influences of different types of knowledge and theory upon reactions to, 314
Intensive therapy unit syndrome, prevention, 130, 223
Interviews with patient, post-intensive care, implications for future practice, 329

K

Knowledge (nursing), influence of different types of, upon reactions to informed consent and concept of patient autonomy, 314

L

Learning, *see* Education
Loving care in ambulance service, 306

 © 1995 Pearson Professional Ltd

Lung, manual hyperinflation in neurosurgical intensive care, multidisciplinary audit, 265

M

MDMA overdose, 6
Mechanical ventilation, *see* Ventilation
Meropenem, 298
3,4-Methylenedioxymethamphetamine overdose, 6
Mouth care practice, 71
  clinical setting and changing, 203
Myocardial infarction, acute
  home-based rehabilitation programme, 10
  pain assessment
    by nurses, 183, 252, 283
    by patients, 183, 283

N

Near-drowning, 40
Needs of family members of patients, self-perceived, 77
Neonatal medicine in E. Europe, 49
Neurosurgical intensive care, manual hyperinflation of lung, multidiscplinary audit, 265
Newborn infant, medical care in E. Europe, 49

O

Ophthalmological disorders, prevention, 217
Oral hygiene, *see* Mouth care
Organisational structure, concomitants of changes in, 181
Oxygen free radicals, 336

P

Paediatrics, *see* Children; Neonatal medicine
Pain, *see also* Analgesics
  children, assessment, 20
  in myocardial infarction, *see* Myocardial infarction
Paracetamol poisoning, 280
Patient–nurse communication, 111
pH, gastric intramucosal, consistency of performing specimen collections for measuring, 123
Post-traumatic stress, recognising, 60
Pressure sores, 44
  risk calculator, Sunderland experience, 344

R

Reactive oxygen species, 336
Reflection used to explore influences of different types of knowledge and theory upon reactions to informed refusal and concept of patient autonomy, 314
Refusal, informed, reflection used to explore influences of different types of knowledge and theory upon reactions to, 314
Relatives, *see* Families
Relocation stress after discharge from ICU, reducing, 333
Reminiscence sessions in ICU, 341
Research in intensive care nursing, European, very little, 244
Responsibility, 87

S

Sedation, 26
Shock trauma Baltimore USA, 151
Sigh breath technique in neurosurgical intensive care, multidisciplinary audit, 265
Sodium chloride (0.9%) for transduced arterial/venous lines, non-heparinised, 148
Sores, pressure, *see* Pressure sores
Southampton, strategies for nursing conscious mechanically ventilated patients in, 140
Standards of care, 1
Stomach pHi and CO^2, consistency of performing specimen collections for measuring, 123
Stress
  patient relocation (after discharge from ICU), reducing, 333
  staff, in intensive care compared to other environments, 293
Sunderland experience, pressure sore risk calculator, 344
Surgery
  cardiac, *see* Heart
  comparative study of patients admitted to high-dependency unit after major and non-major, 66

T

Theory (nursing)
  gap between practice and, bridged via in-service education, 233
  influence of different types of, upon reactions to informed consent and concept of patient autonomy, 314
Thrombolytic therapy, nurses assessing suitability for, 126
Tonsillitis, case study of boy with, 157
Tramadol, 237
Transplant, cardiac, advanced technology within process of, 170, 242

U

United States (Baltimore), shock trauma facility, 151

V

Venous lines, non-heparinised 0.9% sodium chloride for transduced, 148
Ventilation, mechanical
  strategies for nursing conscious patients on, 140
  weaning from, 2

Z

Zeneca (meropenem), 298
Zydol (tramadol), 237
